Thermoplastic hose MSHA approved constant pressure hose with combined reinforcement for very high pressure hydraulic applications up to 350 bar (up to 5000 psi)

# FEATURES

# Inner Tube

Polyester elastomer

## Reinforcement

One braid of aramid fiber plus one braid of steel wire

## Cover

Polyurethane, black, non pinpricked, laser branding

#### Applications

General hydraulic applications requiring high mechanical protection properties of hose and braid, combined with high pressure: construction equipment, hoisting and handling equipment, machine tools

#### Features

Rugged construction for HD application and prolonged lifetime -Combined reinforcement offers low volumetric expansion and optimum change in length characteristics - Abrasion resistant

#### Description

High pressure hose suitable for petroleum, synthetic or water based hydraulic fluids in hydraulic systems. Suitable for general fluid power transmissions like earthmoving, forklift trucks, HD construction machinery, hoisting and handling equipment, high pressure equipment. Steel braid design offers very high mechanical strength which prolongs lifetime of the hose in harsh conditions. Approved by MSHA - Mine Safety and Health Administration - number IC-305.
